VINYL LETTERS & GRAPHICS

With the most up-to-date computerized equipment, letters, symbols, logos and designs are precision cut from pressure sensitive vinyls. Choose from our variety of standard typestyles, let us reproduce your logo, or have us create new designs for you.

Our extensive library of vinyl colors includes translucents, reflectives, metallics and fluorescents; custom colors can be reproduced.

Surface or reverse applications are suitable for both interior and exterior use.

ARCHITECTURAL POST & PANEL SYSTEMS

DIMENSIONAL LETTERS

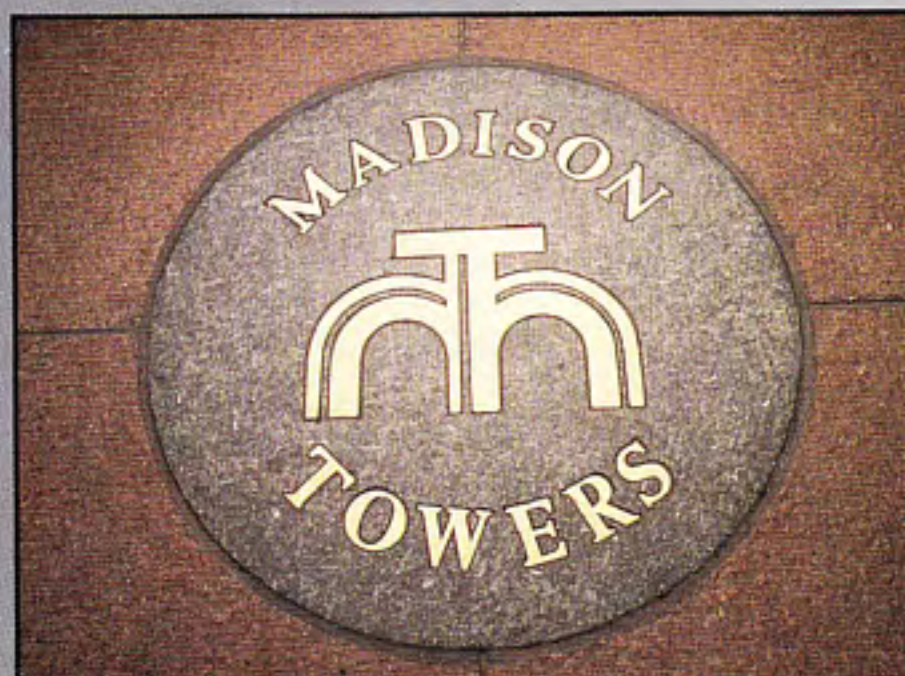

Each letter is custom fabricated in any combination of material, finish, thickness, size or letter style. Letters are hand-crafted from acrylic, jewelite, wood, foam, brass, aluminum, bronze and stainless steel to add versatility for both interior and exterior use. Corporate logos and international symbols are also created with precise workmanship.

JEWELITE PINMOUNTED TO BUILDING FASCIA

POLISHED BRASS PINMOUNTED ON INTERIOR OFFICE WALL

BRASS INLAID IN MARBLE WALKWAY

SINTRA BONDED TO FRAMED PANELS

2" STAINLESS STEEL

JEWELITE BONDED TO MIRROR STOREFRONT

ILLUMINATION

Illumination can be represented through many mediums . . . channel letters, neon, light boxes, stencil cutting, inflatables, computer signs and solar signs. These options create greater nighttime visibility.

STENCIL CUT METAL

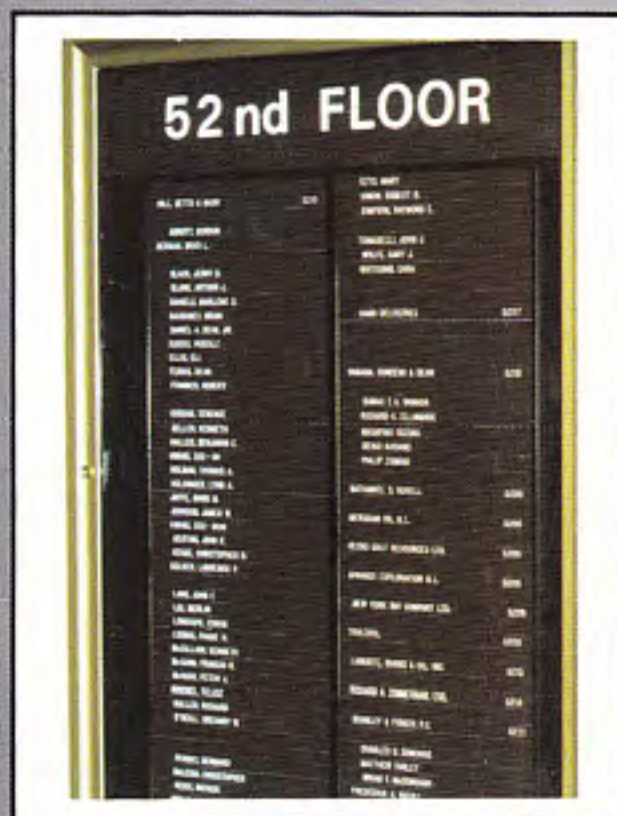

ENGRAVING & CASTING

The sandwich-like construction of plastic engraving stock allows us to engrave through the top layer, exposing letters on a contrasting background. This method is ideal for nameplates, doorplates, deskplates, directories, badges and keytags.

Letters, artwork and insignias can also be photo-chemically reproduced in aluminum, brass or bronze.

NAMEPLATES, DIRECTORIES, DOORPLATES

FLOOR DIRECTORIES

CAST BRONZE

HAND PAINTING & GOLD LEAFING

The technique and skill used by an artist when handlettering or gilding is still unsurpassed. Paper signs, showcards, professional offices, retail windows, banners and wall murals are among the many applications where handlettering is used.
